Atria Senior Living is providing a Smartphone tutorial to help us use our Apple and Android phones more effectively. Let's learn to use our phones for more than just calling someone. Smartphones can connect to the internet and perform a variety of functions. We can learn to read news, check the daily weather updates, chat, play games, or check e-mail with a click. Join us to learn some of these basics and more.

Atria will be providing lunch. This is a free event and you must register at the Community Center in advance

Or call (734) 675-0920 to reserve your space.
